

Energy

Energy is the backbone of the economy. Every day the businesses that develop, produce, transport and market oil, natural gas and electric power face decisions with global scope and bet-the-company consequences. Andrews Kurth lawyers have earned a preeminent reputation in this big stakes, high impact industry, with a track record for success that few law firms can match.

The modern energy industry and our firm both began more than a century ago, and today our energy practice is one of the nation's largest. More than 85 of our lawyers offer counsel around the world to energy producers and the companies that supply and service them. Whether our clients need help with regulatory approval, a complex project financing, a facilities construction contract, an acquisition or a lawsuit, Andrews Kurth has the industry knowledge and legal skill to get the job done.
